## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 26- 29 are rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Settsu-shi EP #1162162. Settsu-shi shows an apparatus for placing an attachment comprising a frame with a fixed camshaft mounted on the frame with a revolving sleeve 21 with a rotatable disk having a cam follower 223 (fig 4). Settsu-shi shows vacuum force means through apertures 493 which are in communication with vacuum port means 491.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 30-32, 36-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Settsu-shi in view of Coenen et al (#6,514,187). Settsu-shi substantially show the claimed subject matter but do not show a knife roller, pressure roller or adhesive applicator as claimed. However, Coenen et al show a knife roller 122 that works with an

application roller as well a pressure roller 128 and adhesive applicators (col 15 lines 60+). It would have been obvious to one of ordinary skill in the art to provide Settsu-shi with the manufacturing operations of Coenen et al to perform various manufacturing operations on attaching workpieces using known means. Regarding the pair of cam tracks as claimed, the examiner notes that it has been held that duplication of parts for a multiplied effect are obvious and within the realm of one of ordinary skill in the art. See St. Regis Paper Co v. Bemis Co, Inc, 193 USPQ 8, 11 (7<sup>th</sup> Cir 1977)

5. Claims 33-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
